

Generate Reports That Fit Your Exact Requirements with ATS Advanced Reporting Services

Fully Customizable Reporting

ATS ► **Advanced Reporting Services** is our latest reporting and data analysis tool for quality data. Its strength lies in giving you the ability to create completely custom reports.

You can create and tailor reports to fit your exact requirements. Designing reports in-house means you can quickly respond to the needs of your business as soon as they arise.

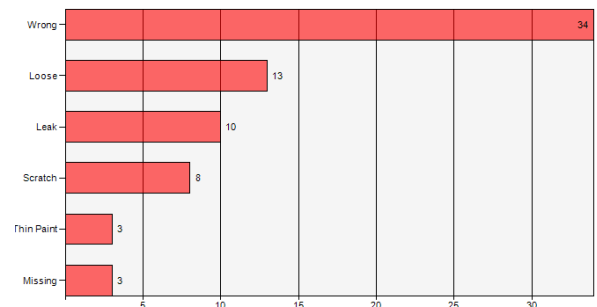

ATS ► **Advanced Reporting Services** takes advantage of Microsoft's SQL Server Reporting Services (SSRS) technologies to take the power of your quality data to new heights.

Reports can be designed to fit your exact needs

Complete Reporting

Reports can be generated for each product tracked in the system, and can be based on factors such as serial number, date, time, production area, historical quality data, operator, defect type, severity, repair status and current location. Report settings can be personalized for each user.

Good reports are essential for good quality control

Accessible Anywhere

The web-based reports can be viewed anywhere in the world using Microsoft Internet Explorer running on secure connections. This allows management to monitor performance even while on the road.

Automated Report Generation

Another useful feature is the ability to schedule up-to-the-minute reports to be sent to the relevant people at regular intervals automatically. Do you need that report on your desk first thing Monday morning? It'll be there.

ATS is an **Independent Solution Provider**, with over 25 years' experience in the manufacturing systems arena and a wealth of experience undertaking Continuous Improvement initiatives and Manufacturing IT solution design, deployments and 24/7 support assignments.
