

# ATS inspect<sup>®</sup>

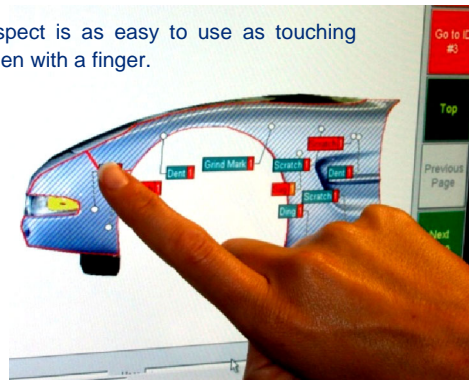

Visual Quality

**ATS Inspect** is a powerful visual quality inspection tool. Attribute and variable data are easily recorded, providing real-time quality reports and alarms for immediate reaction. Don't let defective products ever leave your site again.

Quality inspection with a difference ...

ATS Inspect is as easy to use as touching the screen with a finger.

Real Time Data

Clear Quality Signals

## A Smarter Way to Work

- User friendly touch-screen data entry
- Paperless data collection
- Integrates with existing electronic input devices
- Configurable to any product and any process

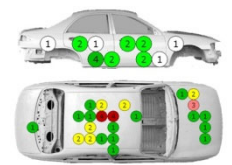

Web Reporting

## A More Efficient Way to Work

- Significantly reduces response time to critical incidents
- Detects recurrent defects and sends alarms to email, mobiles and overhead displays
- Web reporting provides information anywhere, anytime
- Traceability of your products during the production process
- Open system exchanges data with ERP, MES, OPC

Paperless

See Combined Data

## Savings You Can See

- Automatically calculates costs related to quality issues
- Reduces costs related to rework and scrap
- Decreases the number of warranty claims
- Saves time and money with fast, accurate quality checks
