

The production performance suite

**From last week's numbers
to right now.**

Factorise helps manufacturers turn delayed reporting into live performance visibility with trusted data, validated losses and role-based dashboards.

Challenges we help you overcome

Delayed data

Performance reviewed after the shift.

Missing downtime reasons

The number is there, the cause is not.

Unvalidated losses

Teams cannot act confidently on bad data.

Spreadsheet reporting

Visibility arrives too late.

**The number is visible.
The story behind it is not always clear.**

What this suite helps you see

1. Live OEE

See performance as it happens.

2. Loss visibility

Understand downtime, speed and quality losses.

3. Role-based dashboards

Give operators, supervisors and managers the right view.

4. Value stream flow

Spot bottlenecks while there is still time to act.

5. Context notes

Capture the why behind the metric.

6. Complete data capture

Include manual and connected areas.

6 Modules in this suite

1.

Andon Cockpit

Configurable live dashboards with KPIs, live trends and auto-refresh.

4.

Schedule

Planned losses and resource availability in line with schedules.

2.

Production Cascade

OEE, output and downtime across machines, lines, shifts and sites.

5.

Annotations

Add context notes to metrics and trends.

3.

Value Stream Flow

Order flow, throughput and bottlenecks across production stations.

6.

Provide Production Data

Manual counts and events where automation is not available.

Impact you can expect

8%

Productivity boost

Consistent, measurable performance uplift.

30%

Faster response to downtime

Less waste, fewer rework cycles and better use of resources.

20%

Hidden capacity revealed

Turn overlooked losses into real production gains.

**Start with the visibility your teams need most.
Build improvement from there.**
