

ATS Inspect 7.2

Transform your quality inspections into actionable insights

The next generation of digital visual inspection for smarter, more connected manufacturing.

1 Quality inspection without limits

ATS Inspect 7.2 helps manufacturers digitise their inspection processes with a more flexible, connected and user-friendly experience. Capture quality data where it happens, standardise inspection workflows and improve traceability across your operations.

1. Capture anywhere

Perform inspections across Windows, mobile devices, tablets and web browsers.

2. Visual inspection made easier

Work directly with 2D images and 3D CAD models with clear visual evidence.

3. Connected inspection workflows

Manage defects, repairs, checklists and quality records in one seamless experience.

4. Real-time shopfloor visibility

Access live updates and keep teams aligned with the latest inspection data.

2 One experience. Multiple devices

Give inspectors the flexibility to work with the device that best fits their environment, while maintaining a consistent inspection experience.

Mobile

Desktop

Laptop

Tablet

3 Built for modern manufacturing teams

ATS Inspect 7.2 combines powerful new capabilities with a modern, scalable platform, helping you improve quality, increase efficiency and give your teams the tools to work the way they need.

Faster defect identification

Detect issues earlier and reduce quality risks.

Improved traceability

Maintain complete records with visual evidence.

Standardised processes

Reduce variation between inspectors and ensure consistent quality.

Greater efficiency

Minimise rework and manual documentation.

Flexible deployment

Support different working environments across your operations.

4 Why manufacturers choose ATS Inspect

01

Deep expertise in industrial quality solutions

02

Integration with your manufacturing systems

03

Support from digital transformation experts

04

Proven solutions across global industries

From inspections to measurable results
